

Cipal Schaubroeck – IT Delivery manager / Release train engineer (RTE)

Where do you end up?

As a Delivery Manager/RTE at Cipal Schaubroeck, you will be part of a dynamic team dedicated to delivering digital solutions to Flemish government institutions. With more than 30 years of experience, we are the strategic partner of choice for local administrations, thanks to the combination of domain expertise and in-depth knowledge of government processes. Within Cipal Schaubroeck, there is an open, informal culture where innovation and collaboration are key.

You will have the opportunity to lead a team of experts and optimise processes, while having a direct impact on the functioning of local governments. Together, we work towards an efficient and customer-oriented future.

How can you convince us?

We are looking for a driven and results-oriented Software Delivery Manager/RTE with a passion for team development and process improvement. In this role you will oversee the entire software development lifecycle, ensuring projects are delivered on time, within budget, and aligned with business objectives. You will act as a central point of contact, coordinating between various teams (developers, testers, project managers, clients) and ensuring the smooth flow of information and resources. You are an experienced professional who enjoys taking responsibility and performs strongly both autonomously and as part of a team. In addition, you are communicatively strong and know how to inspire and motivate people. As a Software Delivery Manager/RTE you are responsible for the quality of the delivered software.

In your role as **Delivery Manager**, you are ultimately responsible for the organization and secure Software delivery within the **Agile Release Train (ART)**.

Your responsibilities:

- Leading your domain with **agile and self-organizing teams** towards success.
- Managing **capacity, required knowledge, and skills** within the team.
- Translating **strategic goals** into a feasible and effective IT roadmap.
- Executing the **business roadmap** and ensuring a stable production environment.
- Continuously improving processes and collaboration **at Portfolio and ART level**.
- Building and maintaining **strong relationships with internal and external stakeholders** to ensure smooth cooperation and achieve goals.

In your role as **Release Train Engineer (RTE)**, you are responsible for facilitating the processes, events, and execution within the **Agile Release Train (ART)** and overseeing the **release planning and delivery pipeline**.

Your responsibilities:

- Facilitating **PI Planning and ART Sync** to enhance alignment, collaboration, and results.
- Coordinating **dependencies** between teams within and outside the ART.
- Monitoring and optimizing **processes at ART and Team level** to ensure continuous improvement and

efficiency.

- Removing **impediments** that may obstruct the progress of the release train or escalating them if necessary, so management can make informed decisions.
- Monitoring and reporting **progress and delivery** to achieve **PI objectives**.

Why work at Cipal Schaubroeck?

Are you looking for an exciting position within an organisation with a clear vision of the future? At Cipal Schaubroeck, you will get the opportunity to develop professionally and be part of a motivated team.
